This article aims to highlight the potential of bioarchaeological analysis for understanding aspects of social identity in Roman Britain through the use of a more integrated, theoretical approach towards embodied interactions. It encourages future collaborative scholarship between bioarchaeologists, archaeologists and historians.

Embodied Identities in Roman Britain: A Bioarchaeological ...

Archaeological theory refers to the various intellectual frameworks through which archaeologists interpret archaeological data. Archaeological theory functions as the application of philosophy of science to archaeology, and is occasionally referred to as philosophy of archaeology.There is no one singular theory of archaeology, but many, with different archaeologists believing that information ...

Evidence for the disposal of the dead is one of the most common classes of archaeological data; in both prehistoric and historic contexts, archaeologists have long used the remains of death and...

The Archaeology of Death - John Disney Professor of ...

Organ transplantation is dependent on death of the body, but death does not mean the termination of the relationship with the previous embodied self. For instance, it is widely recognised that pronouncing death does not cause the immediate separation of self from body, and therefore ties to the deceased 'self' persist (Klass et al. 1996 ...

Rather, something more complex was afoot. An interdisciplinary approach is necessary to grapple with these questions and gain a better understanding of Classic Maya perceptions of life, death, and the afterlife. My strengths are in archaeology and bioarchaeology, so these approaches are quite prominent in this book.
